

The Final Exam

- ▶ The exam covers all course content (lectures, labs, assigned reading).
- ▶ You may use one *handwritten* sheet of notes (both sides can be used, no photocopied or printed text allowed). Also, similar to the midterm exam, the final exam will contain tables for binary and hexadecimal number conversions and for commonly used HTML tags.
- ▶ During the week before the exam, the following extended office hours are offered (6 full hours!):
 - ▶ Monday, 12/04, 9:00-11:00
 - ▶ Wednesday, 12/06, 12:00-13:00 and 14:30-15:30
 - ▶ Thursday, 12/07, 11:00-12:00 and 13:30-14:30

(These will also be posted on the web page.)

The Final Exam (continued)

- ▶ A review of programming concepts has been posted to the course web page – this should be very useful in the context of exam preparations!
- ▶ In the lecture on Friday, an exercise similar to Problem 4 from the midterm exam will be handed out. A solution will be available for pickup from the box outside of Holger's office by next Wednesday.
- ▶ We are planning to mark the final exam on 18 December, and results should be available on WebCT by 20 December (latest). Final grades will also be determined during that week.

Good luck with your preparations and with all of your exams!
