

Project Retrospective

Due

Your retrospective document is due on Tuesday, December 2 at 11.59pm via handin. Each team should collaborate on the project retrospective and only submit one document. No late assignments will be accepted.

Objective

The goal of this assignment is to have you reflect on your project and think about what you learned and what you would do differently in the future.

Requirements

You must answer the following questions in your retrospective document. The maximum length is 1 page, using a reasonable font size. Shorter is fine as long as you answer all the questions.

1. How did your team track each individual's responsibilities and progress? What would you do differently next time?
2. What is the most important thing you learned about communicating with teammates from this project that you will be able to apply to your next project?

If there are additional topics you'd like to cover, please feel free.

Deliverables

Before the Tuesday, December 2 at 11.59pm:

- Submit your team's project retrospective document via handin. It must be no more than 1 page, using a reasonable font size.

How to use handin for your retrospective:

1. Put the file in your `~/cs310/X-retrospective` directory (where you must replace X with your team name according to the list of groups I posted on Piazza)
2. Run the command `handin cs310 X-retrospective` (again, replace X with your team name)

Other notes about handin

- You can confirm that your assignment was handed in correctly by using the `-c` flag (ie, `handin -c cs310 X-retrospective`)
- If you need to overwrite a previous version that you handed in, using the `-o` flag (ie, `handin -o cs310 X-retrospective`) Assignments will be accepted by handin up to the due date.
- If you are using the web handin, you must zip your assignment first because it will only accept zip files.

Grading Scheme:

1. (30%) Spelling and Grammar
2. (70%) Reflection
