1 Question of the Day

Imagine a world without functions (or other control flow structures allowing repetition, like loops or “jumps”).

If every programmer in the world worked on a single program for a year, how long would it take to run on my laptop?

2 Logistics

2.1 Programming Assignment #2

Due Friday.

2.2 Quiz/Conceptual Assignment #2: Wednesday

2.3 Programming Assignment #3

Coming soon!

3 Finishing the previous class's notes!

file:2013W1-lecture7.org

4 What have we learned today?

- From QotD: control flow matters!
