Custom Final Evaluation for CPSC 314, Dr. Munzner, Summer Term 05

Thanks for filling out this survey - it will help me improve the future versions of this course. To return this evaluation anonymously later, ask the front desk receptionist at the CICSR second floor to put it in my mailbox.

-----------------------------------------------------------------------------------------------------------------------------------

number of hours I spent on
programming projects  1:         2:          3:        4:
written assignment  1:         2:          3:
studying for midterm  1:         final:
required readings:          other course-related stuff:

experience in C++ before course:
none                 some             lots

experience with graphics programming before this course
none                 some             lots

opinion on face-to-face project grading
worse than standard grading
no opinion / the same
better than standard grading

-----------------------------------------------------------------------------------------------------------------------------------

Same questions as midterm evaluation
this course
is worse than I expected  is about what I expected  is better than I expected
the content of this course is
too introductory          just right          too advanced
lectures are
too slow                 just right          too fast
in attending the lectures, I
learn almost nothing      learn some          learn a lot
the lecture slides in this course are
not at all useful          ok              very useful
the grading in this course is
unfair                    fair
in doing the programming projects for this course, I
learn almost nothing      learn some          learn a lot
are the programming projects
too easy                  just right         too hard
in doing the written assignments for this course, I
learn almost nothing      learn some          learn a lot
are the written assignments
too easy  just right  too hard

is the total workload
less than most other courses  about the same  more than most other courses

I attend labs
never  sometimes  always

are TA Warren Cheung’s lab hours
not at all useful  somewhat useful  very useful  didn’t attend

are TA Greg Kempe’s lab hours
not at all useful  somewhat useful  very useful  didn’t attend

are Dr. Munzner’s office hours in the lab
not at all useful  somewhat useful  very useful  didn’t attend

are Dr. Munzner’s newsgroup posts
not at all useful  somewhat useful  very useful  don’t read newsgroup

are the demos shown during lectures
very useful  somewhat useful  not useful

I experiment with the demos outside of class
often  sometimes  never

the delay on seeing my marks for projects/assignments/midterms is
much less than usual in other courses  about the same  much more than usual

I would recommend this course to a friend
yes  no
