

T/F Colour is a property of light

Spectral power is describes light colour is dependent on perceptions.

T/F Humans have three types of cones, so there is no benefit to having a display that uses more than three display colours.

→ try to cover "horseshoe" diagram.

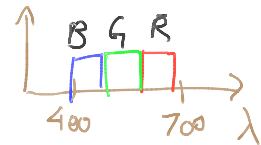

Label the colours of the rainbow.

ROYGBIV

Label white.

Where are the colour: gray? brown?

Complete the following table: (in terms of R, G, B)

ink color	absorbs	reflects
red	G, B	R
blue	R, G	B
green	R, B	G
blue + green	R, G, B	
red + green	R, G, B	
yellow	B	R, G
cyan	R	B, G, R, B
magenta	G	G
yellow + cyan	B, R	R
yellow + magenta	B, G	B
magenta + cyan	G, R
