Custom Final Evaluation for CPSC 314, Tamara Munzner, Jan-Apr 07

Thanks for filling out this survey - it will help me improve the
future versions of this course. To return this evaluation anonymously
later, ask the front desk receptionist on the ICICS/CS second floor to
put it in my mailbox.

----

number of hours I spent on

 programming projects 1:   2:   3:   4 (so far):

 written assignment   1:   2:   3:   4:

 studying for midterm 1:   midterm 2:   final (so far):

 required readings: other course-related stuff:

experience in C++ before course:

none   some   lots

experience with graphics programming before this course

none   some   lots

opinion on face-to-face project grading
 worse than standard grading
 no opinion / the same
 better than standard grading

opinion on number of midterms
 prefer two midterms, early and late
 prefer just one midterm, in the middle

this course
 is worse than I expected   is about what I expected   is better than I expected

the content of this course is
 too introductory   just right   too advanced

lectures are
 too slow   just right   too fast

in attending the lectures, I
 learn almost nothing   learn some   learn a lot

the lecture slides in this course are
 not at all useful   ok   very useful

the grading in this course is
 unfair   fair

in doing the programming projects for this course, I
 learn almost nothing   learn some   learn a lot

are the programming projects
 too easy   just right   too hard

in doing the written assignments for this course, I
 learn almost nothing   learn some   learn a lot

are the written assignments
 too easy   just right   too hard

is the total workload
 less than most other courses   about the same   more than most other courses

I attend labs
 never   sometimes   always

are TA Matt Baumann's lab hours
 not at all useful   somewhat useful   very useful   didn't attend

are TA Gordon Wetzstein's lab hours
 not at all useful   somewhat useful   very useful   didn't attend

are Tamara's office hours in the lab
 not at all useful   somewhat useful   very useful   didn't attend

are the newsgroup posts from Tamara, Gordon, and Matt:
 not at all useful   somewhat useful   very useful   don't read newsgroup

are the demos shown during lectures
 very useful   somewhat useful   not useful

I experiment with the demos outside of class
 often   sometimes   never

the delay on seeing my marks for projects/assignments/midterms is
 much less than usual in other courses   about the same   much more than usual

I would recommend this course to a friend
 yes   no
